Stand-Alone R Program Instructions

Please use this as a guide to run the Stand-Alone Program against your data.

1. Import the file in R. Use the name "insurance_test"
2. Copy and paste the "Stand-Alone R Program" code into the R Script.
3. Run each section in the code.
 - a. 1 - Importing a Test File and check import
 - b. 2 - DATA PREPARATION
 - c. 3- MODEL Deployment
4. Your final P_TARGET_FLAG and P_TARGET_AMT will be saved in the R object called "FINAL_Submission" with the INDEX column.
5. Once you complete running the last line of the code, you will see a new CSV file in your working directory. By default, this file is named as "Singh_Gurjeet_Insurance_Test_Score.csv".
